

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	1 October 2026
Team ID	SWTID-2026-3491
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

S.No	Team Member	Role
1	Mukilan Thirkoodapathi	Team Leader
2	Madhan Kumar N R	Team Member
3	Manoj Prabakaran S	Team Member
4	Mohamed Savdhu S	Team Member
5	Mohammed Ibrahim Bathusha J	Team Member

Selected problem statement: HR teams receive bulk employee data as spreadsheets and re-type it into ServiceNow by hand, which is slow, error-prone and creates duplicate employee records when the same data is loaded again.

Step-2: Brainstorm, Idea Listing and Grouping

Team Member	Ideas
Mukilan Thirkoodapathi	Load the spreadsheet into an Import Set table (staging area) instead of the live table Use a Transform Map to map source fields to the target table
Madhan Kumar N R	Create a custom table (Employee Test) with Employee ID, Employee Name, Email, Department and Location Use Auto Map Matching Fields / Mapping Assist to reduce manual mapping
Manoj Prabakaran S	Enable Coalesce on Employee ID so repeat imports update records instead of duplicating them Re-run the same sheet to prove 0 inserts and 0 updates

Team Member	Ideas
Mohamed Savdhu S	Create reports: Employees by Department (pie), Employees by Location (bar), Employee List (list) Add the reports to an Employee Analytics dashboard
Mohammed Ibrahim Bathusha J	Verify each run using Transform History (inserted / updated / ignored counts) Restrict dashboard access by users, groups and roles

Grouping of ideas:

Group	Ideas included
A. Data loading & mapping	Import Set staging table, Transform Map, custom target table, Auto Map / Mapping Assist
B. Data quality	Coalesce on Employee ID, re-import testing, Transform History verification
C. Insights & access	Department / Location / List reports, Employee Analytics dashboard, role-based sharing

Step-3: Idea Prioritization

Idea	Impact	Effort	Priority	Decision
Import Set + Transform Map for bulk load	High	Low	1	Selected
Coalesce on Employee ID (no duplicates)	High	Low	2	Selected
Reports on Employee Test table	Medium	Low	3	Selected
Employee Analytics dashboard	Medium	Medium	4	Selected
Transform History validation and access control	Medium	Low	5	Selected

All five prioritized ideas are combined into one solution: a spreadsheet import pipeline in ServiceNow that is accurate, duplicate-free and reportable.
