

Ideation Phase

Define the Problem Statements

Date	1 October 2026
Team ID	SWTID-2026-3491
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An HR Admin who receives new and updated employee lists in Excel	Load bulk employee data (ID, name, email, department, location) into ServiceNow	I have to copy and paste each record by hand and mistakes creep in	There is no structured import process set up between the spreadsheet and the Employee table	Frustrated and worried about data accuracy
PS-2	A ServiceNow Admin responsible for employee data quality	Re-import the same or revised spreadsheets without creating duplicate records	Each import inserts the rows again as new records	The Transform Map has no Coalesce field, so existing employees are not recognised	Concerned and less confident in the reports built on this data
