Customer Journey Map

Date	1 October 2026
Team ID	SWTID-2026-3491
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Customer Journey Map:

A customer journey map shows the steps a user goes through to reach a goal, along with their actions, thoughts, emotions and pain points at each stage. **Persona:** HR Admin / ServiceNow Admin importing employee data from a spreadsheet.

	Prepare Sheet	Create Tables	Load Data	Transform	Update with Coalesce	Report & Dashboard
Actions	Create sample data in Google Sheets and download as Sample Spreadsheet.xlsx	Create Employee Test (u_employee_test) with 5 string fields	Load Data creates Employee Import (u_employee_import) staging table	Create Transform Map, auto map fields, run Transform	Mark Employee ID as Coalesce, import revised sheet again	Build 3 reports and add them to Employee Analytics Dashboards
Touchpoints	Google Sheets, Excel	Tables > Create New, Form Layout	System Import Sets > Load Data	Transform Map, Mapping Assist	Field Maps related list, Transform History	Reports, Dashboards, Share option
Thoughts	"Is the sheet format correct?"	"Are all five fields added?"	"Will the staging table match my sheet?"	"Are source and target fields mapped?"	"Will old records be updated, not duplicated?"	"Can the team see the totals at a glance?"
Emotions	Neutral	Focused	Curious	Hopeful, then relieved on Success	Confident when 2 inserted and 2 updated	Satisfied
Pain points	Manual typing of records	Missing a field breaks the mapping	Wrong sheet number or header row	Unmapped fields	Duplicates if Coalesce is not set	Dashboard form needs ACL admin override
Opportunities	Use a fixed column template	Reuse the table for other imports	Keep Sheet 1 and Header row 1	Use Auto Map Matching Fields	Coalesce prevents duplicate rows	Restrict by users, groups and roles
