

Project Design Phase

Solution Architecture

Date	1 October 2026
Team ID	SWTID-2026-3491
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

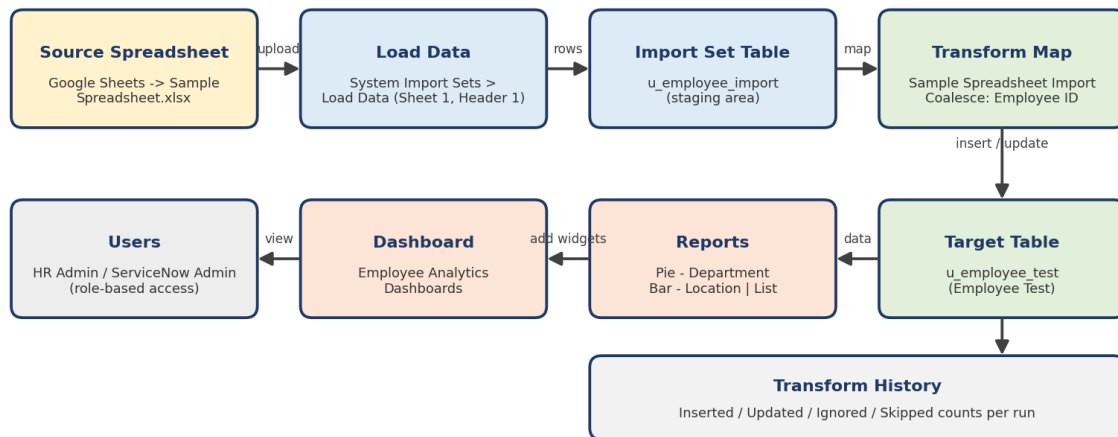

Solution Architecture:

Solution architecture is a complex process with many sub-processes that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour and other aspects of the software to project stakeholders.
- Define features, development phases and solution requirements.
- Provide specifications according to which the solution is defined, managed and delivered.

Solution Architecture Diagram:

Solution Architecture - Spreadsheet Import using Transform Maps (ServiceNow)

Data Flow:

Step	Component	What happens
1	Source Spreadsheet	Sample data is created in Google Sheets and downloaded as Sample Spreadsheet.xlsx
2	Load Data	File is selected as the source, Sheet number 1 and Header row 1; Import Set table Employee Import is created
3	Import Set Table	Rows are stored in u_employee_import, the staging area
4	Transform Map	Source fields are mapped to Employee Test fields (Auto Map and Mapping Assist); Employee ID is set as Coalesce

Step	Component	What happens
5	Target Table	Records are inserted or updated in u_employee_test
6	Transform History	Inserted, updated and ignored counts are checked for every run
7	Reports and Dashboard	Three reports feed the Employee Analytics Dashboards for HR and admins
